

APTAMIL PRODUCT DECISION TREE: TERM INFANT PRODUCTS

If you would like to order products for professional evaluation, scan this QR code to visit our Healthcare Hub or contact your Nutricia representative

*Suspected mild-to-moderate cow's milk allergy (CMA) is usually confirmed with the elimination of cow's milk protein for a period of 2-4 weeks. Followed by re-introduction of the milk allergen and reoccurrence of symptoms to confirm a CMA diagnosis. Meyer, et al. Allergy. 2020 Jan;75(1):14-32.

** Based on Rome IV Criteria for Functional Gastrointestinal Disorders in Infants and Toddlers. Zeevenhooven J, et al. Pediatr Gastroenterol Hepatol Nutr. 2017;20(1):1-13. Breastfeeding is best for babies. Good maternal nutrition is important for breastfeeding. Partial bottle feeding could negatively affect breastfeeding. Reversing a decision not to breastfeed may be difficult. Improper use of infant formula may affect the health of the baby. Social and financial implications should be considered. For Healthcare Professional use only - not for distribution to the general public. This is a guide only. You should not use this information to diagnose a health or medical condition or problem, or alter, commence, or delay any medical treatment.
