

GROWING UP WITH THE NUTRICIA ALLERGY MANAGEMENT RANGE

What might a Cows' Milk Protein Allergy journey look like for your patients aged 12+ months?

1. Child with CMPA on AAF approaches 12+ months

2. Is the child allergic to cow's milk at 12 months of age?
Assess with cow's milk challenge

NO

Transitional advice as per HCP

If the CMPA has not resolved

3. Initiate new PHARMAC script for up-age AAF
Prescribed by paediatrician

4. Recommend plant-based nutritionally complete formula (e.g. soy protein based) if up-age AAF not tolerated¹

5. Reassess if the child is still allergic to cow's milk
Assess with cow's milk challenge
