**IMPORTANT NOTICE: Name change of Aptamil Allerpro Syneo and Aptamil Pepti Junior on PHARMACEUTICAL schedule.**

Dear Healthcare Professional,

This is to provide an update on the name change of Nutricia's **extensively hydrolysed formulas** on the **pharmaceutical** schedule.

In response to clinician feedback, we have removed the 'Aptamil' brand name from our extensively hydrolysed formula listings found on SA1557 of the pharmaceutical schedule. When applying for special authority you will need to **search using the new names** below in highlighted yellow.

Pack	Description	Current Name	Current Pharmacode	New Name	New Pharmacode
	Extensively hydrolysed infant formula for infants aged 0-6 months old for cow's milk protein allergy.	Aptamil Allerpro Syneo Stage 1	2577410	<b>Allerpro Syneo Stage 1</b>	<b>2641283</b>
	Extensively hydrolysed infant formula for infants 6-12 months old for cow's milk protein allergy.	Aptamil Allerpro Syneo Stage 2	2577429	<b>Allerpro Syneo Stage 2</b>	<b>2641291</b>
	Extensively hydrolysed infant formula from birth to 12 months.	Aptamil Gold + Pepti Junior	2492997	<b>Pepti Junior</b>	<b>2641305</b>

Please note:

- This change is only to the listing of these brands on the PHARMACEUTICAL schedule.
- There is no change to the packaging, the brand name on the product label, or to the composition of any of these products.
- All products pictured above are still available and funded.

For any additional concerns or urgent queries regarding these products, GPs, Allergy and Paediatric Specialists can contact their Nutricia Representative or the Nutricia Careline team on any of the following:

FOR HEALTHCARE PROFESSIONAL USE ONLY - not for distribution to the general public

BREASTMILK IS BEST FOR BABIES: Professional advice should be followed before using an infant formula. Partial bottle feeding could negatively affect breastfeeding. Good maternal nutrition is important for breastfeeding and reversing a decision not to breastfeed may be difficult. Infant formula should be used as directed. Improper use of infant formula may affect the health of the baby. Social and financial implications should be considered.
